

PATENT ENGINEER (remote working)

boesherz | goebel patent attorneys is a forward-thinking, internationally oriented patent law firm in Germany. We rely on a decentralized approach with employees throughout Germany and modern remote working models. Our technical focus is on Software, Artificial Intelligence, Electronics and Telecommunications. The driving force in what we do are great, innovative ideas that deserve sustainable protection. We believe the way to achieve this is by strategic foresight and thinking outside the box to fully align IP protection with the interests of our clients. We are committed to this. Our clients value us as a dynamic and reliable partner.

We are looking for a highly motivated **Patent Engineer** for our team:

Key Responsibilities

- Conducting prior art searches for invention disclosures and opposition proceedings,
- Preparation of freedom-to-operate analyses,
- Conducting inventor interviews,
- Drafting patent applications,
- Drafting responses to office actions.

Skills

- Degree in patent engineering, electrical engineering, or software engineering, ideally with a focus on artificial intelligence or telecommunications,
- First experience in intellectual property rights,
- Analytical, structured, and creative abilities,
- Persistence and assertiveness,
- Joy in the precise use of German and English to describe technical issues,
- Very good communication skills.

We Offer

- Personal support from the firm's attorneys and patent engineers,
- A pleasant working atmosphere in a highly motivated team,
- Remote working model - We offer flexible working models with the option to work from home to suit your life situation,
- Use of modern automation and AI tools for daily (drafting) work,
- Fully digital and cloud-based working for optimum work efficiency,
- An attractive and competitive salary for your valuable and high-quality work,
- 30 days vacation.
